Colour theory worksheet answers

Thank you for your participation! Value The lightness or darkness of tones or colors. White is the lightest value; black is the darkest. The value halfway between these extremes is called middle gray. Space An element of art by which positive and negative areas are defined or a sense of depth achieved in a work of art . Value is a three-dimensional geometrical figure (i.e.: sphere, cube, cylinder, cone, etc.), as opposed to a shape, which is two-dimensional, or flat. In a broader sense, form, in art, means the whole of a piece's visible elements and the way those elements are united. Form is an enclosed space, the boundaries of which are defined by other elements of art (i.e.: lines, colors, values, textures, etc.). Shapes are limited to two dimensions: length and width Shape is used to describe either the way a three-dimensional work actually feels when touched, or the visual "feel" of a two-dimensional work Texture refers to distances or areas around, between or within components of a piece. Space is the element of art that is produced when light, striking an object, is reflected back to the eye Color is an identifiable path created by a point moving in space. It is one-dimensional and can vary in width, direction, and length. Line Art, a color, as red, yellow, or blue, that in mixture yields other colors. Primary Colors a color, as orange, green, or violet, produced by mixing two primary colors. Secondary Colors are made up of yellow-orange, orange-red, red-violet, blue-violet, blue-green and yellow-green. These colors are combinations of both primary and secondary colors. Intermediate Colors include white, gray, blue and green (think calming blue waters). Contrast with warm colors. Cool Colors include red and orange (think exciting fire and volcanoes). Contrast with cool colors. Warm Colors groups of three colors that are next to each other on the color wheel, with one being the dominant color, which tends to be a primary or secondary color, and a tertiary. Red, orange, and red-orange are examples. Analogous colors directly opposite each other in the color spectrum, such as red and green or blue and orange, that when combined in the right proportions, produce white light. Complementary Colors Vocabulary:Color - An element of art that refers to reflected light.Color wheel - Invented by Sir Isaac Newton, the color wheel represents the color spectrum bent into a circle. Primary colors - The most basic colors: red, blue, and yellow. These colors cannot be produced by mixing but are used to mix all other colors. Secondary colors - Colors that are made by mixing equal parts of two primary colors. Orange, green, and purple are secondary colors.Tertiary colors - Colors that are made by mixing equal parts of a primary color and a secondary color. Red-purple, blue-purple, red-orange, yellow-orange, blue-green, and yellow-green are tertiary colors Neutral colors - Black, white, and gray are neutral colors. When these colors with colors on the color wheel they affect the value and intensity of the color.Color Schemes Monochromatic - literally means one (mono) color (chroma). So a monochromatic color scheme is made up of one color and it's shades and tints.Complementary Colors - Colors that are positioned directly across from each other on the color wheel. Ex. Blue and orange, red and green, yellow-green and red-purpleAnalogous Colors - are colors that are next to each other on the color wheel. Ex. Blue, blue-green, green, and yellow-green; red, red-purple, purple, blue-purple.Color Triads - consist of three colors found on the color wheel that are equally spaced apart from each other. Ex. Red, blue and yellow or orange, green and purple.Split-Complementary - a color scheme that is made up of a color and it's complements closest analogous colors. Ex Blue, yellow-orange and red-orange. Red-orange, red-purple, greenWarm Colors - colors that are usually associated with warm things. Ex. Red, yellow, orangeCool Colors - colors that are usually associated with cool things. Ex. Blue, purple, green AssignmentsProject 1: Watch the Color Video and answer questions on the handout.Alternative - Watch slideshow and fill out worksheets along with the slideshow.Project 2: Using the color scheme/color wheel handout, paint the Color Wheel Painting Worksheet.Painting instructions...you can only use the primary colors plus black & white.1. Paint the primary colors.2. Create and paint the secondary colors. Red + Yellow = Orange Yellow + Blue = Green Red + Blue = Purple3. Paint Warm Colors - Red, Orange & Yellow4. Paint Cool Colors - Green, Blue & Purple5. Paint Red, Blue & Yellow with their complementary colors next to them.6. Paint analogous colors.7. Monochromatic is one color plus black and same color plus white. Paint the monochromatic area.8. Create a scale of gray. Place a brush tip of black into white, mix = Light gray. Add another dot of black = Medium gray. Add another dot of black = Dark grey.PRINT - Color Theory Paint Sheets / PRINT - The Color Wheel Worksheet Final Project 3: Choose a Color Scheme (listed below). On 8.5 x 11 piece of painting paper draw an abstract design using 7 straight lines and 3 to 5 circles. Lines and circles can overlap to create a unique look. Paint the design using the Color Scheme chosen. Schemes - Monochromatic, Complementary, Warm or Cool Colors.See examples: Once you have created your abstract design with lines and circles, trace it with a black sharpie. Erase all pencil marks. Now paint using the Scheme you have chosen.See student examples: This completes the Color Theory Unit. In order to continue enjoying our site, we ask that you confirm your identity as a human.
